SUBMISSION HIGHLIGHTS: PAPER IV

Fusion Engineering and Design (Elsevier)

Manuscript Title: Shercliff-Hartmann Magnetohydrodynamic Velocity Profiles and Pressure Drop Characteristics in Liquid Metal Divertor Channels

Author: Jacob James Rasmussen (ORCID: 0009-0009-7084-6523)

Publishing Model: Traditional No-Fee Subscription Publishing Model

Core Research Highlights (Strictly ≤ 85 Characters Per Bullet)

- 3D MHD model computes Shercliff-Hartmann liquid metal flows at Ha = 500. *(74 chars)*
- Core velocity flattens with Hartmann boundary layer thinning down to 0.2 mm. *(78 chars)*
- MHD pressure drop gradient evaluated at 0.45 MPa/m for Pb-17Li channels. *(74 chars)*
